KINETIC DATA DEVELOPER

G2IT is looking for a Senior Application Developer to assist our team in the support and enhancement of the Kinetic Data suite of applications. The position is remote with limited travel.

Duties and Responsibilities:

Develop service items, catalogs, tasks, and task handlers to meet the customer's needs. Leverage the Kinetic Data product suite (including, Kinetic Request, Kinetic Task, Kinetic Calendar, and Kinetic Survey). Support all phases of the software development life cycle, including requirements analysis, system design, software development, testing, and documentation.

Qualifications:

- 5 years' experience developing service items leveraging the Kinetic Data product suite (including, Kinetic Request, Kinetic Task, Kinetic Calendar, and Kinetic Survey)
- 3 years' experience developing integrations with the Kinetic Data product suite, using technologies such as LDAP, Remedy and AWS
- 3 years' experience with Java, JavaScript, CSS, Ruby, XML, Kinetic Request Remedy Edition (Apache Cassandra and Kinetic Request Core Edition being very helpful)

Preferred:

- Experience with the development and administration of the BMC Remedy ITSM suite (specifically the Incident, Change and Asset Management modules) preferred
- An existing Department of Defense (DoD) Security Clearance (or a U.S. Citizen with the ability to obtain one by passing a complete background check)
